**CLI** | Chartrand Laframboise  
INVESTIGATION

Dear Client,

We are proud to announce that we just concluded the transfer of ownership of Chartrand Laframboise inc., (hereafter named CLI), to C-Chip Technologies Coporation, with its head office in Montreal.

We have established ourselves, since our inception in 1986, as the reference for private security matters, this by professional services offered by people with high moral values and integrity, with the objective of protecting your reputation and therefore ours.

The main reason for our decision to sell was our conviction to expand by way of acquisitions, to offer professional services as per our quality standards, to all our clients wherever they may operate. Since there is an ongoing consolidation of markets and a pressure by major clients to have one service provider in security, we position ourselves to be the anchor for all investigative, protection and consultation services in Quebec, across Canada and at the international level. Being the leader in Quebec, our expansion is a natural step to assure the perenity of CLI, being challenged by market globalization and competition.

C-Chip, being a public corporation, will assure access to funds in order to complete acquisitions to pursue our expansion plan, which corresponded to the objectives of C-Chip.

We thank you for your confidence during all these years and rest assured that we will continue to provide professional services, with integrity, determination and care in all we do, including protecting your information and reputation. The undersigned will remain the senior managers of CLI. We will maintain rigourous management and will be the architects of our expansion. We are also minority shareholders of C-Chip Technologies Corporation.

Yours truly,

Louis Laframboise  
President and COO

Jean Talbot  
President and CEO
